

- e. Each health care provider should identify himself or herself as soon as entering the child's room.
5. Understanding autism spectrum disorders (ASDs) is very important for those who care for children. Goals of treatment for these children include:
- a. Helping with placement in a long-term care setting, because most children cannot remain at home
 - b. Putting the child hospitalized with an ASD in a room with another child to help him or her feel more comfortable in the strange environment
 - c. Providing a structured routine, whether at home or in the health care setting
 - d. Providing comfort for young children by holding or cuddling when able, because the disruption of routine can be frightening

Correct Answers

1. a, b, d; 2. a, c, d, f; 3. a, b, c, e; 4. a, c, e; 5. c
